The Club Trophy Formula

Points are awarded each race for the percentage of the field that you beat, including yourself.

 = good run

The formula is: $100 \times (T - P + 1) / T$ where T = the total no. runners, P = your place

For example in a field of 100 runners:
 if you came 1st you would score 100 points
 if you came 100th you would score 1 point
 if you came 27th you would score 74 points

The formula provides a pretty fair comparative score for athletes of both sexes and in various age groups.
 If you win you will score 100. If you run midfield you will score 50. If you finish last you will score close to zero.

For the half marathon, juniors are allocated the average of the best 3 other races.
 For the Ekiden Relay, as the legs are all different, you get the average of your best 3 other races.
 You are allowed to drop your worst race, ie. the best 9 out of 10 count towards this prestigious award.
